CHIRANI Boumediene Mohammed
Web, Mobile and FullStack Developer

Hi my name is Boumediene, I am young man who's intersested in All things technology currently looking for a job as Web Developer

PROFILE

Algerian Electronic Engineering graduate with a strong work ethic. Seeking I work as a web developer and am proficient in Javascript DOM manipulation and the React framework. I am capable of converting wireframes and designs into pixel-perfect, performant frontend code utilizing html, css, javascript, and the react eco system.
Using graphql/REST apis, I am quite capable of transforming data into useable client applications.
GIT, redux, and the flux notion are also familiar to me.

WORK EXPERIENCE:

Mar 2022 current

FullStack Mobile Developer, Kuwait
Pythys Software

- Created UI elements (components) based on the client's requests using React/ React-native.
- Added Rest Api endpoints to existing code bases using Groovy and Moqui
- Reviewed existing code made by fellow developers. Solving conflicts and existing technical problems based on the design of our product manager before deployment.
- Optimized React-Native Applications for better performance and better user experience wrote clean code improving other developers' experience, replacing component libraries.
- Our backend is already deployed so we are relying heavily on incremental testing and continuous integration.
